

ABA Surveying Environmental Policy

ABA Surveying Limited recognises the importance of environmental protection and is committed to operating its business responsibly and in fulfilment of its compliance obligations relating to geomatics and geospatial surveying services. It is the Organisation's declared policy to operate with and to maintain good relations with all regulatory bodies.

The Company is committed to achieving environmental best practice throughout its business activities wherever practicable. ABA Surveying Limited recognises that economic growth, development and a healthy environment must be closely linked.

Environmental protection and sustainable development are responsibilities that government, business, communities and individuals should strive towards. Where possible environmental management issues will be integrated with Health & Safety and other operational systems in line with overall business objectives of ABA Surveying Limited.

ABA Surveying Limited is aware of Network Rail's Company Standard: (NR L2 ENV 015) Environment and Social Minimum Requirements for Projects – Design and Construction (previously Contract Requirements Environment) and is committed to the promotion of, and compliance with, environmental best practice.

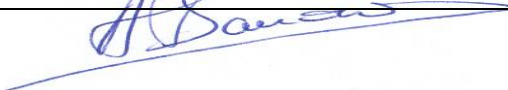

ABA Surveying Limited is committed to:

1. Minimising the use of energy, water and other natural resources in operations.
2. Minimising waste and identifying the best environmental option for disposal.
3. Considering the effects our activities may have on the environment and minimizing the environmental impact of aspects of work activities that are environmentally significant.
4. Preventing pollution.
5. Considering opportunities to make a positive contribution to protecting the environment in all activities.
6. Reducing the impact of our activities on adjacent businesses and residents and behave as a 'good neighbour'.
7. Encourage active participation from Company staff, at all levels, in improving environmental performance.
8. Minimizing the environmental impact, for the life cycle (including disposal), of plant, equipment, and all physical assets under the control of the supplier.
9. Minimise noise nuisance, especially on site where the public or residents may be affected (including night work).
10. Setting and monitoring environmental objectives
11. Continually improving its environmental performance.
12. Ensuring that our activities minimize the effects of climate change.

The principles detailed above apply to all Company business activities, including work in the rail industry. ABA Surveying Limited will comply with its client's environmental requirements and work closely to ensure its impacts are as small as reasonably practicable.

This Policy is communicated to all employees, suppliers and sub-contractors and is made available to interested parties.

The Company holds ISO 14001:2015 Environmental certification for its Environmental Management System.
